TITLE : METHOD FOR REPORTING PHYSICAL
ABNORMALITY AND PORTABLE
WIRELESS WITH FUNCTION OF
DETECTING PHYSICAL
ABNORMALITY

ABSTRACT : PURPOSE: To achieve a reporting of physical abnormality even when no hand is used nor consciousness is lost.

CONSTITUTION: A measuring device 2 is mounted on an upper arm part, a wrist part or the like of a human body 1 to measure heart beats and a blood pressure and outputs a physical abnormality signal when the results exceed a set range. A wireless apparatus 3 is so arranged to input the physical abnormality signal to be outputted from the measuring device 2 so that an alarm sound is emitted to report physical abnormality with wireless. A canceling switch 4 is set on the wireless apparatus 3 to stop the alarm sound and the reporting of the physical abnormality.
